As we were able to take our position yesterday we met a large lot o our position vesterday we met a large lot of prisoners which our skirmishers had gobbled. It is interesting to see and talk to the Johnnies. Those brought in vesterday were veterans of Hardee's Corps. As a class they are a tough, wiry set of men; they wear gray pants, gray jeans "roundabouts," with blue cuffs and collars. These men seemed inured to all kinds of weather, neither sun or storms seem to affect them; they never, or seldom, use tents, and but few have blankets. Some carry a bedquilt or a piece of carpet for a blanket. They can work hard, fight a battle, go on a long can work hard, fight a battle, go on a long march, lay down in the mud, dust or leaves, and sleep, and be up ready for work any time. No springs are used, but the framework is strong enough to stand the wear and tear of jolting across stony yeld and precipitous approaches to drifts. The ox-wagon is built either for pleasure or transport rure and signals. or transport pure and simple. In the former case it is tented with waterproof canvas, and fitted according to the pleasure of the owner; in the latter case the hind portion of the vehicle has but a small-tented shelter. The tires of the wheels are tented shelter. The tires of the wheels are of iron, usually overlapping the wooden rim. A wagon costs usually about £80, but a second-hand one costs considerable ss, and the primitive harness for a span of, say, 16 oxen costs only £25.

At present the most expensive item in the

turnout is the span of oxen, which are very scarce, owing to their depletion by rinder-pest, costing as much as £20 each. A common practice among the Dutch in the Cape mon practice among the Paten in the Cape Colony is to purchase a new wagon, load it with provisions, and trek to some up-country town, such as Kimberley or Majeking; sell their goods en route, and then dispose of the wagon. Such traders are known as togt-On each side of the wagon are lockers

All the tints of the rainbow are scattered broadcast on with an effect that is the artistic. In Natal all ox-wagons are licensed, and

must have afflixed on their side in a con-spicuous place the name of the owner and his residence. The Cape Colony wagon is much longer and heavier than the Natal one, and not so easily handled. The tented wagon was much used during the Zulu war, but it is not so good to fight from as the buck-wagon, and its tent is much torn when passing through the thorn scrub so in South Africa.

Yet that was nothing in the way of impudence to what happened to the officer who was commanding the Rangers when they were quartered at Edinburgh years agone. There had been a deal of drunkenness and disorder amongst his men and by ness and disorder amongst his men, and he was determined to stop it. So one early morning parade he ordered an old offender, who had been out all night, to be marched across the regiment's front in his muddy tunic and torn trousers, as an awful warning. When the prisoner arrived at the left flank, he turned to the Colonel, saluted him and said, just as if he had been some swell inspecting them: "Thank ye, Colonel; faith, it's one av the foinest regiments I've ever seen Ye may dismiss them!"

The Boers continued to concentrate in front of Roberts, at Osfontein, it being re-ported that Joubert was in command. As one of the English military reviewers put it, it almost seemed as though he "wished to let the Boers assemble as much of their army as they can before beginning to try conclusions with them."

Meanwhile fresh stores and ammunition and traver required in towards Roberts

and troops poured in towards Roberts.

On Wednesday, March 8, Roberts suddenly made a movement. Nothing was done to disturb the cymmetry, the deadly ingenuity, of the Boer trenches in front of him. He marched out infantry estimated, from the commands named, at 20,000 men, and the commands of the command o from the commands named, at 20,000 men, and sent 10,000 horsemen and horse artillery in a bold sweep around the Boer left, whereupon the Boer center and right became untenable. The enemy are being closely followed by cav-alry, horse artillery and mounted infantry, while Tucker's Seventh Division, Col-ville's Ninth Division, and the Guards Brigade, under Pole-Carew, are making their way across the river at Poplar's Drift, where I propose to place my headquarters." A few hours later he reported: "We had a very successful day, and have completely routed the enemy, who are in full retreat. The position which they occupied is extremely strong, and cunningly arranged with a second line of intrenchments, which with a second ansed us heavy loss had a would have caused us heavy loss had a direct attack been made. It seems that the movements of the nounted men were somewhat too rapid for the supporting infantry, and, as a result, the Boer position was turned before the main body could strike effectively. The Boers fell back precipitately and, extending to the southeast, checked the advance of the British cavalry with a heavy rifle fire at 800 yards' range. Accordingly, Gen.
